The 2nd Preparedness Drill for the year **2017** of **EDA THESSALONIKI-THESSALIA** was successfully conducted on **Wednesday 22 March 2017** in **Trikala**. The success was made possible with the contribution of all services involved and the staff of the Gas Distribution Company, along with the participation of the fire department, the police, and the contractor companies.

The drill that was conducted by **EDA THESS** in **Trikala** aimed at testing and checking the completeness of emergency plans and the required cooperation between the structures involved, at improving coordination, communication and management of information, and **mostly at effectively dealing with the incident** within the required timeframe.

The drill scenario was developed by the Network Management and Emergency Intervention Unit and involved a “**Gas leak**” at the internal installation of a boiler room inside an apartment building on 11-13 Skoufa street, in Trikala, Municipality of Trikala.

- The On-Duty Technician arrives at the venue at..., starts the inspection (he is not aware that this is a preparedness drill), takes measurements and establishes that the leak comes from the internal installation (measurement 12% gas).

The drill starts at **18:10** when the building manager calls EDA THES Emergency Intervention Call Center to report a strong smell of gas in the boiler room of the apartment building on 11-13 Skoufa street in Trikala.

- The On-Duty Technician calls the Operational Technician (Balatolis) and informs him of the leak and the need to call the Fire Brigade, the Police and the contractor.

The On-Duty Technician gives safety instructions to the tenants, having established after inspection that there is a leak in the boiler room and the staircase. He opens the staircase windows up to the top floor to let the gas go out.

➤ The Operational Technician of EDA (Balatolis), the Fire Brigade and the Police arrive at the venue and are briefed on the situation.

EDA THESS staff asks for the following:

- Contractor's presence – Riser car equipped with the air discharge device for the boiler room (funnel) .
- The Fire Brigade to inspect and evacuate the building.
- The Police to prevent traffic around the building's block.
